

# Energy and CO<sub>2</sub> Policy Statement

Acacia Water B.V. endorses the importance of sustainable business operations and is committed to reducing energy consumption and CO<sub>2</sub> emissions. As an organisation, we want to actively contribute to the energy transition and the Paris climate goals.

That is why we apply the following energy and CO<sub>2</sub> policy:

- We map out our CO<sub>2</sub> emissions (scope 1 and 2) annually and publish the results via the CO<sub>2</sub> Performance Ladder.
- We set ambitious, but achievable reduction targets and take concrete measures to achieve them.
- We comply with all relevant laws and regulations in the field of energy and emissions.
- We actively involve our employees in achieving energy savings and encourage sustainable behavioural change.
- We communicate transparently about our performance and plans, both internally and externally.
- We actively seek cooperation with chain partners and clients to promote joint CO<sub>2</sub> reduction.

This policy statement applies to the entire organization and is evaluated annually and adjusted if necessary.

On behalf of the management of Acacia Water

B.V., Gouda, 11-08-2025

A.C. de Vries, Director
